

RESIDENT'S GUIDE TO TRAFFIC CALMING MEASURES

What is Traffic Calming?

Traffic calming is the combination of mainly physical measures that reduce the negative effects of motor vehicle use, alter driver behaviour and improve conditions for non-motorized street users.

**So you've noticed your street needs some traffic calming...
now what?**

Step 1

Submit a **Traffic Calming Measures application form** available on the Zorra Township website.

You will need to provide

- A description of the location
- A sketch of the location, and
- Your contact information

Step 2

Township staff will **review the application** and determine if the road is applicable for a traffic calming measure (TCM). Staff will be in contact with you within 10 business days from the date the application form is submitted.

Step 3

If the road is applicable for TCM, you will be directed to complete a **Neighbourhood Support Form**.

Must receive 51%+ support for the TCM from households impacted by the potential TCM.

Step 4

If the Neighbourhood Support Form receives 51%+ support, Township staff will conduct a **TCM Needs Assessment**. If the road meets the criteria, appropriate TCMs will be evaluated for the location.

Step 5

The public will be notified, and invited to comment, on the proposed TCM.

Step 6

Traffic calming measure is finalized and implemented.
