Truck Safety Policy

This policy serves as formal notice that all truck drivers entering and exiting our licensed pit are required to obey all applicable traffic laws, posted speed limits and safety regulations without exception.

Any driver observed violating traffic laws while leaving the pit – including but not limited to speeding, failure to stop or yield, unsafe turning, unsecured or leaking loads, or tracking mud or debris onto public roadways-will be subject to immediate corrective action.

Please be advised that failure to comply with traffic laws and safe driving practices will result in the driver denied future access to the pit. This policy is being implemented to protect public safety, comply with legal obligations and maintain positive relations with the community and its residences.

Use extreme caution when using public roads as they are also being used by school buses and pedestrians and children walking along the shoulders.
